## Daily Accountability Questions

Q: Did you spend from 0700 to 1900 in a building/investing/maintaining/billing mindset? spending minimal time on non productive overhead, delegating everything possible and executing against the days objectives?

A: Yes

Q: Did you allocate your time optimally today in both personal and building/billing focus?

A: Yes

Q: Did you fully live your motto "ShowDone,Don't say what will be done" today?

A: Yes

Q: Did you complete all of your routine items for today on schedule and with no exceptions?

A: Yes

Q: Were you the co founder and peer executive that TSYS and its stakeholders needed you to be today?

A:Yes

## Wins / Challenges and things of note

Glad to have build out at site y and site r on target for completion by end of day Sunday. What's left is well bounded and not too taxing.

(Writing this 0754 11-6-2023)...

My prediction of a trump win came true. I based that prediction on my own observations of the macro environment, society cross section etc. and that, the majority of male voters (and perhaps female voters as well) do not believe a woman can be president. It's a sad day for the USA and the world. Siri made in China 2025 looming and the massive increase of Chinese Communist Party espionage operations to achieve that strategic outcome (and therefore invade Taiwan and cripple the west)... Trump being in power is an existential threat. Whenever you hear Russia or Iran or China , you must remember that

those three countries are essentially one. They have deeply integrated their economies , security / intelligence apparatus and military.

I had a plan to execute for either election outcome. I am expecting my trump win plan. I'm not letting myself be distracted. I will grieve for this country and the world at a time and place of my choosing. Now.... Now it's time to work

## **Food / Fitness / Health Log**

## Todays objectives

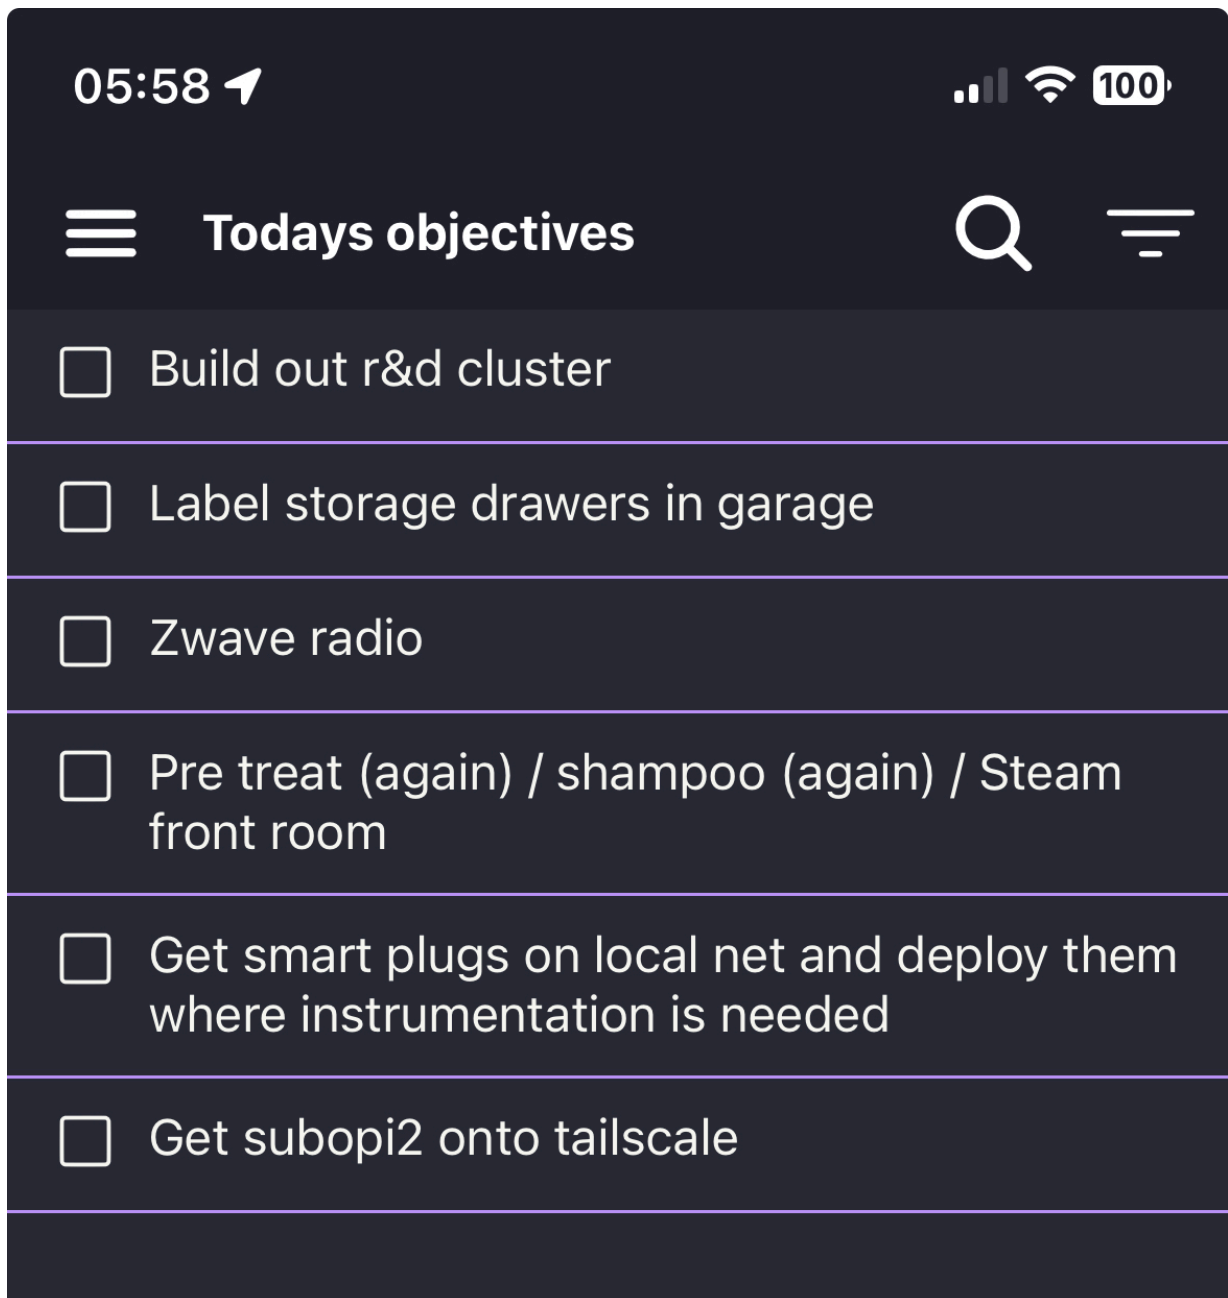

Fig. 2: 5AF6FC78-A420-4E15-B6DF-D3B1E02DBD3D.jpg

As of 12:29 (some wins , some losses but all objectives finished ). Pulling in more now and will post once I've finalized my plan.

## General mood/progress/thoughts log

0530 up and running

0600 plan finalized for day (no digital objectives today, laser focused on site R build out completion).

0800 travel errand completed. Arrived at site r.

0847 captured site r houseops project list to Redmine

1200

found out my smart plugs were all bad.

Did some troubleshooting on the zwave radio. Seems to be a USB issue, may need to move it to a hub without extension cable.

Stripped out a bunch of cross connects from r&d racks and wires up consoles for all r&d switches.

Had lunch.

1229 moving to other hub resolved issues with the zwave radio. And also with the nitro keys.

1414 did some more r&d build out work. Rest will happen in the new year. Lots of techops and revgen work todo before r&d cluster. Got groceries. Heading to site y.

1648

Put in stairs for RV. More adjustment will be needed.

Finished splitting up Joplin import material and original calibre library into private / public import folders. Working on importing content to Joplin / calibre (and audiobookself ) now. Also have photos split up into private / public and uploads to albums are underway. Feeling very good to be closing out my email / file / photos / notes / todo organizing. I started in December last year. Made various small sprints. Major progress was made during my October trip for sure. Building on that now. Data organization will be balance of my day until midnight.

Also been experimenting with Hugo again.

Updated my email signatures to match across laptop / phone / tablet

Kicked off LLM model downloads to use with Jarvis (Joplin AI plugin). (Hence my big push to finish my Joplin imports).
